**New generation traditional espresso  
machine from Nuova Simonelli**

Appria Life is the next generation of Appria – the traditional espresso machine used by thousands of baristas worldwide.

The machine was developed by Italian espresso experts, Nuova Simonelli who used their extensive experience to create a machine which features the proven performance and espresso quality of the Appria but with new, enhanced features and barista-friendly design.  
To make great coffee even simpler.

Appria Life takes energy saving seriously – with 13% less energy consumption than previous models and sustainable materials.

A straightforward and dependable machine, Appria Life is designed for operators who want to serve great coffee, consistently everyday.

Life.

## ENERGY EFFICIENT

### INSULATION

Improved insulation thanks to Drytex® Thermal technology wrapped around the boiler.

**13%** LESS ENERGY  
CONSUMPTION\*

### CONSUMPTION

**20%** OVERALL  
REDUCTION

Overall reduction in energy consumption and environmental impact than previous model\*\*.

\* Value calculated on Appia Life vs Appia II benchmark

\*\* Life Cycle Assessment is a structured and standardized method used worldwide that quantifies the potential impacts on the environment and human health associated with the use of a product, starting with respecting resources and emissions.

# APPIA LIFE: PRODUCTIVITY AND CONSISTENCY

## PROVEN PERFORMANCE, NEW GENERATION

Designed for consistent, exceptional coffee. The Appia Life features the same proven technology as previous Appia models with new, improved features. Updates include soft-touch portafilter, adjustable steel steam wand, wide-work surface, and dual scale pressure gauge. All while maintaining the high-quality Nuova Simonelli is famed for.

## RELIABILITY PERFORMANCE, MAXIMUM QUALITY

The Soft Infusion System (SIS) gently pre-wets the coffee cake for a gentle, even extraction resulting in maximum flavour. Durable and sustainable materials mean there's less machine but more engagement. The lower profile makes it easier for the barista to interact with the customer.

## SMART AND SIMPLE

Unique features to make things quick and simple - automatic cleaning function, adjustable steam arm, easy maintenance with adjustable nozzle, new side opening system and redesigned groups to ensure minimal disruption.

# GREAT COMFORT MEANS HAPPY BARISTAS

## REVERSE MIRROR

This feature allows the barista to check the coffee dripping and cleanliness of the filter holder from a much more comfortable position.

## ALIGNED CUP WARMER

The cup warmer is aligned with the top of the machine. Thanks to this feature, the user has an easier reach and speeds up the working process.

## PUSH BUTTON PANEL

The push-button panel has been recreated to be user friendly and more resistant in the long run.

## EASY MAINTENANCE

Appia Life has been designed to be more efficient when it come to maintenance. The complete new style of the machine facilitates the user in any operations routine. Its new adjustable nozzle attachment, new side opening system and redesigned groups, are all features that allow it to be majorly efficient.

←  
*redesigned  
and enhanced*

## **NEW BARISTA FRIENDLY DESIGN**

Designed for simplicity of use with new ergonomic features to improve day to day usability for baristas. Includes a reverse mirror, which allows the barista to check the group head for cleanliness and dripping from a comfortable position, user-friendly push button panel which is more responsive to the barista. All in a sleek look with chrome panels.

# FUNCTIONAL ASPECTS

Appia Life has all the great features of the previous Appia, only better; push & pull levers, soft-touch portafilter, stainless steel drip tray, adjustable steel nozzles, the wide work surface, the water level indicator, the dual scale pressure gauge and the raised or standard height groups are all re-confirmed features of this incredible machine.

Other optional features including Easycream technology: replicating the milk-texturing process for velvety milk quality every time.
